

### **Three Gun Fun Division and Other Rifle Variants**

Some new changes have been made for 3 Gun going forward (or at least until the Ammo Crisis is over).

1. We are creating a new “Fun” Division! This division will allow shooters to enjoy our courses of fire with their 22lr firearms and / or their PCC firearms. This division is defined as “any combination of Rifle + Pistol (2 Gun) or Rifle + Pistol + Shotgun (3 Gun) with any sighting systems installed”. This division is for shooters who wish to shoot their 22lr Rifle or PCC, or for shooters who wish to shoot a center fire rifle with a 22lr pistol. The shooters may choose to participate as a 2 Gun or 3 Gun competitor but no distinction will be made during registration.

2. We are recognizing the ammo crisis is hitting everyone hard. This is causing many people to dig deep into their ammo stash and potentially bring out firearms they are not regularly using while on the clock or obscure firearms that may not be as well known by the shooting community. We are asking people to note that we have created a new field on the registration page requiring the shooter to identify the Rifle / PCC they plan to shoot the match with. The fields are as follows:

1. AR variant: This includes any variation of the popular “AR” platform including “direct impingement, piston operated, or any variation of blowback operation”. If it uses the standard AR lower platform and controls, this is the option to select.
2. AK variant: This includes any variation of the AK-47, AKMS, AK-74, AK-100 series or the direct blowback PCC variants.
3. 10/22: This is for the 22lr shooters who plan to use this platform
4. Other – Match Director Approval. This field will include the ability to provide the platform you plan to shoot with. This does not mean you will be turned down. This is just to let us recognize the platform you are using and ensure you are squadded with RO’s who understand how to make your rifle safe.

NOTE: We are still not allowing 308, 30/06 or higher calibers at this time.

Please bear with us as we continue to find ways to be creative in stage design, divisions, and matches to keep everyone shooting and having fun.
